To Find the Number of Plants or Trees to an Acre, Square Method:

Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which divided into the number of feet in an acre (43,560) will give the number of plants or trees to the acre.

SHIPPING

Parties ordering goods should indicate whether they wish them sent by freight or express, also route. In absence of these instructions we will forward to best of our judgment. When losses occur by delays or other causes of whatever nature while goods are in transit, make claim at once to the forwarding company.

TERMS

Cash with order, unless other satisfactory arrangements are made, before shipping. Orders for C. O. D. shipment should be accompanied by one-fourth cash. We will allow 3 per cent discount for cash with order, at the regular listed prices.

PRICES

A separate price list will be sent with this descriptive catalog, and will be kept corrected with current prices.

Introductory

IN presenting our annual price list for the current season you will note we have cut our prices to the very lowest level and still maintain our standard in growing and handling nothing but high class stock, as we handle no other.

We wish to thank you for past favors and liberal patronage, and assure you we shall try to give value received for every dollar's worth of goods you are kind enough to purchase from us in the future, as we believe we have in the past. We urgently request correspondence and trial orders from new customers, feeling sure you will be more than pleased with our way. Buy direct; get acquainted with the man who grows the trees ; who stands back of every order he sells you. We insist that, if you have any reason for complaint upon receipt of goods, you will kindly notify us at once. We are only too willing to adjust any fault on our part.

The larger part of our extensive business is done through mail order, hence we are always able to make the very lowest prices. It is the sensible way of doing business, besides giving you the satisfaction that personal dealings always bring.

Our trees are carefully selected and inspected. Your order is promptly filled at once; you get your trees all nicely packed and fresh right at your home—not left at some delivery point to lie around to spoil, as is often done through the old system. It ought to be a pleasure to know you can buy trees direct from a reliable nursery; know what you get; get what you order; get it at once, nicely packed and in first class condition, right at your door, at a big saving over the

old way. Why not mail us your order? Let us prove to you our way is right. Our trees are all packed in paper lined boxes, in damp shingle toe, except small packages, which are neatly wrapped in burlap.

We wish to state here that our mail order system has been a wonderful success. It means better trees to you at greatly reduced prices. Once you order we feel sure you are our customer ever after.

At prices herein quoted all trees and plants are carefully labeled, securely packed and placed on cars at Carlton, Ore., free of charge.

NOTICE To Customers

ERRORS OR SHORTAGE — In case of errors or shortage, customers are requested to notify us at once, otherwise we will assume that the goods are satisfactory as per invoice.

We accept all orders with the understanding that we are not to be held responsible should injury befall the stock from fire, frost, drought, or other causes beyond our control.

We are located in the famous Willamette Valley, County of Yamhill. It is famous for its Prunes, Walnuts, Filberts, and many other fruits. Our soils are of a rich free loam, non-irrigated, and produces a heavy caliper and root system unequaled. Climatic conditions are perfect for growing well matured Nursery Stock. Our excellent shipping facilities enables us to get deliveries to our customers in the quickest possible time.

To old or new customers : Don't fail to write us if wanting large orders. We are always ready to make you attractive prices. 5 per cent discount for cash in advance.

Carlton Nursery Co.
Carlton, Oregon.

APPLES—Summer

Yellow Transparent—One of the best for both home and commercial use. Good size, skin pale yellow, flesh crisp and juicy. Ripens about Aug. 1st.

Red June—Medium, oblong, deep red; excellent for table; one of the best early apples. July.

Duchess of Oldenburg—A beautiful Russian apple; large yellow, streaked with red; tree vigorous and very productive; juicy with rich sub-acid flavor; excellent. August.

Golden Sweet—Rather large; pale yellow; very sweet and productive. Ripens in August.

Red Astrachan—Large, fine grained, juicy, rather acid, crimson color, abundant bearer, season latter part of July.

Maiden's Blush—Medium, well-shaped; yellow, with a very distinct red cheek on the sunny side; flesh white; pleasant sub-acid flavor. August.

APPLES—Fall

Gravenstein—Large; striped red and orange. Most popular early variety on Coast. August.

Fall Pippin—Very large, yellowish-green; tree vigorous and very productive; flesh white, tender and mellow; one of the best fall apples. September.

Fameuse—(Snow Apple)—Medium roundish; greenish-yellow, with streaks of deep red on sunny side; flesh remarkably white, very juicy; October.

Golden Russet—Medium; skin rough, yellow covered with dull russet; flesh whitish-yellow, sprightly, sub-acid flavor; September and October. Thrives well in a warm climate.

Gloria Mundi—Very large, greenish-yellow, flesh coarse, tender, with pleasant sub-acid flavor; excellent for cooking and drying; October.

Waxen—Tree very thrifty, fruit medium size with deep, rich, yellow, color. The best for drying and cooking.

APPLES—Winter

Delicious—Large; ribbed and irregular; dark red where apples color well. A long keeper and of remarkably high quality in favorable locations. November.

Spitzenburg—Large; tapering; light red; delicately coated with light bloom; flesh butter yellow, crisp, rich, sprightly, vinous flavor; one of the best. November.

Rome Beauty—Large; yellow striped with bright red; very handsome; flesh tender, juicy, sprightly. October.

Grimes Golden—Medium to large; skin golden yellow, sprinkled with gray dots; of beautiful appearance and good flavor. November.

Jonathan—Medium to large; conical; striped, mostly red; tender, juicy, rich vinous flavor; very productive; good keeper; one of the best varieties either for table or market. October.

Northern Spy—Large; roundish, somewhat conical; pale yellow striped with red; rich, pleasant flavor; rapid and erect grower. November.

Rhode Island Greening—Large; slightly flattened; greenish yellow; flesh yellow, fine grained and excellent. A regular and heavy bearer in almost all localities. October.

Winesap—Medium size; oblong; skin smooth, dark red; flesh yellow, firm, crisp, with a rich, high flavor; a productive bearer. November.

Wagner—Medium to large; deep red in the sun; flesh firm sub-acid and excellent; very productive; bears very young; December to May.

Yellow Bellfleur—Very large; oblong; skin smooth, pale lemon yellow, often with blush next the sun; flesh tender, juicy, crisp, with a slightly sub-acid flavor; one of the very best. October.

Arkansas Black—Large; round; regular; smooth and glossy; yellow where not covered with deep crimson, almost black; flesh very yellow, firm, fine-grained, juicy; flavor sub-acid, pleasant, rich. A long keeper. October.

Baldwin—Large, roundish; deep, bright red; juicy, crisp, sub-acid, good flavor, very productive. October.

King—Very large; yellow splashed with crimson; rich, sub-acid flavor. Vigorous grower and good bearer. September.

Ben Davis—Medium to large; yellowish, almost entirely overspread with two shades of red; flesh white, tender, moderately juicy, pleasant, sub-acid; December to March.

Red Cheek Pippin—Large greenish-yellow, with a fine red cheek; juicy, tender and good tree erect, good and productive. Keeps well till March or April.

Newton Pippin—Large; yellow with brownish red cheek; firm, crisp, juicy, with a very rich, high flavor. Generally considered the best winter apple in California. November.

Stayman's Winesap—Large; a seedling of Winesap and considered quite an improvement; yellow, well covered with dark red; flesh yellow, sub-acid and of best quality. November.

Winter Banana—Medium to large; golden yellow, usually shaded crimson; flesh fine grained with a very rich, sub-acid flavor. Tree healthy and vigorous. Commences bearing very young. October.

Ortley—Pale yellow of Belleflower type; excellent quality.

Bailey Sweet—Tree hardy, vigorous and productive, fruit large yellow striped dark red. The best late sweet apple. November.

CRAZ APPLES

Hyslop—Large, dark crimson with bloom; very showy and popular on account of its size and hardness; November to January.

Yellow Siberian—Large, fine golden-yellow color.

Whitney—One of the largest, glossy green, splashed carmine, firm, juicy, pleasant, great bearer; excellent for cider. August.

Transcendent—Fruit very large; tree immensely productive; fruit juicy and crisp; skin yellow striped with red, the best of its class for cider; September.

PEARS—Summer

Bartlett—Large; smooth; clear yellow; flesh white, juicy, buttery and highly perfumed. The most popular sort in this state; the best early variety and has no competitor for market or canning. August.

Seckle—Rather small; regularly formed, yellow with russet red cheek; flesh cream color; flavor rich, spicy, unique and characteristic. Excels all other sorts in quality. September.

Clapp's Favorite—Large; greatly resembling Bartlett; ripens a few days earlier. An excellent medium early variety. August.

PEARS—Autumn

Beurre d'Anjou—Large; russety yellow, often with a fine red cheek; flesh perfumed, buttery and melting. October.

Comice—Large, skin greenish yellow, becoming fine yellow at maturity. Flesh fine, white, melting, juicy, sweet, a little buttery, rich, slightly aromatic. October and November.

Winter Bartlett—Fruit large, very much resembling the Bartlett, flesh tender, melting and juicy. A good late pear.

Winter Nellis—Medium size; dull russet; melting, juicy, buttery and of the highest flavor. January.

PEARS—Winter

Bosc—Handsome deep yellow, slightly russet; very highest quality, tender and aromatic. Tree rather weak grower. October.

Clairgeau—Large, deep yellow with blush russet specks; flesh high flavored and tender and juicy. October.

Flemish Beauty—Large; pale yellow, nearly covered with russet; rich, juicy, melting and sweet; very vigorous and productive. September.

Howell—Medium size, roundish, russet on sunny side.

Fall Butter—Fruit below medium size, flesh white, juicy, sweet. August.

CHERRIES

Bing—Large; dark brown or black; very fine, late; vigorous grower with heavy foliage; a good shipping variety. July.

Lambert—Large size and good quality; deep, rich red; flesh firm, and flavor unsurpassed; excellent shipping variety; regular and heavy bearer. Ripens two weeks later than Napoleon Bigarreau. July.

Black Republican—A native of Oregon. Fruit very large, shining black; flesh very solid and firm; fine; a good keeper and will bear transportation well. Tree a moderate grower and rather tender, an early and profuse bearer.

Black Tartarian—Largest size; bright purplish black; very rich and delicious; beautiful grower and an immense bearer. June.

Late Duke—Large; red; the best of late sorts. Last of July.

Waterhouse—(Improved Royal Ann)—One of the best for use as a pollenizer among the sweet cherries.

Royal Ann—A magnificent cherry of the largest size; pale yellow, becoming amber in the shade, with a bright red cheek; flesh very firm, juicy and sweet. Free grower and enormous bearer. July.

Governor Wood—Large, light red, rich and delicious; tree strong grower and productive.

May Duke—An old, well-known, excellent variety; large; dark red; juicy, sub-acid, rich. June.

Montmorency (Large)—One of the best of the sour

cherries. Large; red; slightly acid. Ripens about July 1st. Being extensively planted for the can-
nery trade.

Kentish (Early Richmond)—Red; acid; valuable for
cooking; very productive. July.

PEACHES—Summer

Alexander—Medium to large; greenish white, nearly
covered with a deep, rich red; flesh white, very
juicy and sweet, with brisk, agreeable flavor. Very
early. July.

Champion—Large, cream white, slight flush; tree
hardy, should be in every collection. July.

Hale's Early—Large, nearly round; skin greenish-
white, mostly covered with red and can be readily
separated from flesh when fully ripe. Flesh white,
melting, juicy, sweet and most delicious; adheres
partially to the pit. July.

Mayflower—“The earliest peach known.” Results
have fully substantiated this claim and it still
holds that title. It is absolutely red all over, with
white flesh of excellent flavor. As large as Alex-
ander and ripens two weeks earlier at Niles. June.

PEACHES—Fall

Muir—An excellent bearer, and does not curl; fruit
large to very large; skin and flesh uniformly yel-
low clear to the pit; a fine shipper and one of the
best canning peaches in the United States; as a
drying peach it excels all others ever introduced.
August.

Salway—Large; yellow with crimson cheek; flesh
deep yellow; very juicy, melting and rich; the most
valuable late variety. September.

like Early Crawford, but is larger, earlier and bet-
ter.

Foster—Very large; yellow with red cheek. Much
like Early Crawford, but is larger, earlier and bet-
ter. Runs very uniform in size. A fine yellow
freestone. August.

Tuscan Cling—Large; yellow; red at pit; heavy bear-
er; best of all Clings; fine shipper. In great de-
mand by canneries on account of its early ripen-
ing, as it is the first Cling to ripen. August.

Elberta—Very large; skin golden yellow where ex-
posed to the sun; flesh yellow, juicy, rich, sweet
and splendidly flavored; tree very prolific and pre-
sents a handsome appearance. It is a perfect free-
stone and one of the most successful market va-
rieties. August.

J. H. Hale—A valuable new table, shipping and dry-
ing peach. Smooth skin, almost fuzzless. Very
firm. Ships almost like an apple. Yellow free-
stone; flesh tender, excellent quality. Larger than
the Elberta and ripening about the same period.
From a California standpoint not in the class of
canning peaches because it is red at pit and rags
in the syrup. August.

Early Crawford—A magnificent, large, yellow peach.
of good quality. Its size, beauty and productiv-
eness make it one of the most popular varieties
both for home use and commercial planting. Au-
gust.

Orange—Cling; large, yellow.

Late Crawford—Fruit very large, roundish; skin yel-
low, with dark red cheek; flesh deep yellow, juicy
and melting, with a very rich and excellent vinous
flavor. August.

LEIGHTON or IMPROVED ITALIAN PRUNE

A new variety of Prunes, originated in the Robert Leighton orchard near Yamhill, Oregon.

Only after careful observation for four years and a final test of analysis, by Prof. W.S. Brown, Chief in Horticulture, of the Oregon Agricultural College, have we decided to offer for sale THIS NEW VARIETY OF SPECIAL MERIT.

Report of Analysis, Oct. 27, 1920

By W.S. Brown, Chief in Horticulture, of Oregon Agricultural College. Contents of samples submitted as follows:

FLESH.....	95.72 per cent.
PITS	4.28 " "
SUGAR	14.05 " "

DESCRIPTION—Shape, oblong, being very uniform and regular of evenness in size, fine grained, extremely small free stone pit, very rich in sugar content, the average season containing about 25 per cent more sugar than the Italian prune; color, deep blue; skin, smooth and apparently tough; season of ripening, at the same time as the Italian prune; SIZE, average 40 per cent larger than Italian, the average running 2½ ounces per prune, choice or selected, 3 ounces each.

Of all the varieties originated in recent years this one gives promise of becoming standard.

Superiority Over Other Varieties

ORIGINAL TREE—Very productive and vigorous, also regular bearer.

LARGE SIZE FRUIT—Establishes a grade of its own, thus enabling growers to place the product on the market at a premium price, of from 20 to 40 per cent more than may be obtained from prunes of the average size of other varieties. In seasons when the market may become sluggish, the larger grades of either dried or fresh prune, are always first in demand; and, on account of the limited supply of the extremely large size, this new variety should always command a ready market at PREMIUM PRICES.

LARGE PERCENTAGE OF SUGAR CONTENT—This means that each bushel of fresh prunes, in the average season, should produce from 22 to 25 pounds of the dried product, or from 15 to 25 per cent more than the fruit of the ordinary Italian prune.

This new variety is being offered on the market this year for the first time, by the CARLTON NURSERY COMPANY, of Carlton, Oregon.

All orders placed will be accepted or booked in accordance with conditions named on special contract blanks herewith.

PLUMS

Abundance—Large; globular, with point at apex; showy and beautiful; bright cherry color with decided white bloom; flesh yellow, exceedingly juicy, tender and sweet; extremely early and profuse bearer; very strong grower. August.

Burbank—Large; rich cherry red, slightly mottled with yellow; flesh deep yellow, juicy, very sweet when fully ripe; agreeable flavor; tree vigorous grower; bears early and is extremely productive. August.

Satsuma—Fruit large, nearly round; dark red; flesh dark red; solid color from skin to pit; firm, rather juicy, fair flavor; pit very small. Extremely productive. August.

Mammoth Gold—Large yellow, very productive, sweet and delicious.

Grand Duke—Tree regular and prolific bearer. Dark purple; flesh greenish yellow, with rich flavor; fine shipper. Late August.

Green Gage—Small; round; greenish yellow with brown dots; very juicy and sweet. Considered to have the finest flavor of the European sorts. September.

Maynard—Tree vigorous grower, fruit large and very good.

Bradshaw—Very large; dark purple; juicy and good; fine early variety. August.

Diamond—Tree wonderful grower and heavy and regular producer. Fruit very large, oblong; dark purple with deep bloom. A splendid shipper. Middle of July to early August.

Wickson—Tree strong, upright grower. Heart-shaped; flesh amber; juicy. Early August.

Climax—Very large; deep, dark red; flesh yellow; delicious flavor. Tree vigorous and very productive. Middle of June.

Columbia—Very large, round, dark red; rich vinous flavor; hangs on tree a long time. Oblong.

Fruit Plum—Large, roundish, brownish red; coarse grained but juicy; pleasant, sprightly flavor. Free-stone. July.

Jefferson—Large; greenish yellow; one of the best for canning. July to September.

Reine Claude—Large; greenish-yellow, spotted with red; firm, juicy, sugary and of fine quality; very productive. September.

Yellow Egg—Very large; egg-shaped; yellowish skin and flesh; rather acid until very ripe, when it becomes sweet. September.

Damson (Shropshire)—Medium size; dark purple; flesh melting, juicy and rich. September.

Shiro—Fruit egg shaped. Good size, bright yellow, thin bloom, cling stone. Fruit fine for canning.

PRUNES

Our French are all of the Improved type. Our Italian are propagated from Wood selected from the best bearing trees, producing the larger size prunes, assuring you of a pure strain Italian.

Italian (Fellenberg)—The commercial prune of the west. Too well known for description.

Hungarian (Grosse Prune, Pond's Seedling)—Very large, dark red, juicy and sweet. September.

Silver—A seedling of Coe's Golden Drop, with which it is almost identical. Bears heavily in some dis-

tricts. September.

Imperial—This has proved to be the largest and finest prune cultivated in California. Reddish or light purple color, thin skin, sweetness and high flavor. It contains more sugar than the French prune. Analysis shows 20.4 per cent of the French prune. August.

Sugar—Extremely early, very large; yellow flesh, tender and rich in sugar; a light purple. Contains almost 24 per cent sugar. Tree an unusually vigorous grower and very productive August.

French Improved—Tree a strong grower, is identical with the common variety, except the fruit averages much larger than the common sort. In most all new plantings the improved French is being used. September.

Tragedy—Medium size; skin dark purple; flesh yellowish green; very rich and sweet; freestone. Its early ripening makes it very valuable for shipping. July.

Standard (Burbank production)—One of the best new productions. Sugar content nearly 20 per cent. Very large and productive.

Leighton (Improved Italian)—The recent analysis given by the Oregon Agricultural College, would indicate that this new acquisition, as soon as available in quantity, will be used in practically all future commercial plantings, instead of the variety now commonly known as the "Italian Prune." A complete description, with report of analysis from Professor W. S. Brown, Chief in Horticulture, of O. A. C., with cuts of prunes, etc., will be issued later in special circular, showing in detail the superiority compared to other varieties.

QUINCE

Pineapple—Fruit very large, apple-shaped, clear yellow; flesh very tender; can be eaten raw like an apple; makes a high-flavored jelly. September.

Orange—Large, golden yellow, very productive.

NECTARINES

Boston—Very large and handsome, deep yellow with red in sun.

Early Violet—Medium size, skin yellowish green with purple cheek.

APRICOTS

Tilton—Large, oval, slightly compressed; flesh firm, yellow and parts readily from the stone; heavy and very regular bearer; seems to be more exempt from late frosts than any other variety. July.

Moorpark—One of the largest, most popular and widely disseminated apricots; deep orange or brownish red; flesh quite firm, bright orange, parting freely from the stone; quite juicy, with a rich and luscious flavor; a favorite canning variety. In some sections a shy and irregular bearer. August.

Blenheim—Above medium; oval; orange; flesh deep yellow, juicy and fairly rich; vigorous grower and regular, prolific bearer. July.

Royal—A standard variety; skin dull yellow, with an orange cheek; flesh pale orange, firm and juicy, with a rich, vinous flavor; equally valuable for canning and drying. July.

ALMONDS

Nonpareil—Large, full kernel, thin shell; tree of a weeping habit and a strong grower.

I. X. L.—Large, generally single kernels; hulls easily; soft shell; tree a strong, upright grower.

Texas—This is one of the most popular varieties of almonds grown in California, originated in Texas;

tree a good grower and prolific; nut medium size, soft shell.

Ne Plus Ultra—Similar to above, but of different habit of growth.

NUT TREES WALNUTS

WALNUTS IN THE NORTHWEST

Walnuts growing in the Northwest have passed the experimental age. It has been demonstrated by many bearing trees and orchards throughout the Northwest, that, we here, especially in the Willamette Valley, are producing the most choice nut in size, flavor, and color, in fact we are producing now the fancy nut for the world, bringing the highest prices of any nut on the market today. The soils and climatic conditions here are perfect for the production of a high grade walnut. Every land owner should at least have a few walnut trees planted around their home. The walnut makes a fine shade tree and is very ornamental as well as most profitable.

PROPOGATION—Our trees are all grafted on the California black walnut, which is a strong grower, producing a good root system. Our scions are selected from the best bearing trees of the pure strain Franquette and Mayette. We have a nice block of young seedlings we are grafting this season. We would be pleased to quote you on your wants large or small.

Black Walnuts

We have a nice block of the pure California Black Walnut now being planted quite extensively by orchardists in the regular way. After 2 or 3 years growth they can be top grafted very cheaply and successfully. These we are offering at very attractive prices.

Franquette—Nuts very large, long and pointed; kernel full-fleshed, sweet and rich; buds out late in the spring. We have fruited this variety for many years, never failing to get a full crop. Probably the best French sort for commercial purposes.

Mayette—One of the best; nuts large and uniform, decidedly flattened at the base; shells light colored; tree hardy, buds out late and bears abundantly.

CHESTNUTS

American Sweet—A highly ornamental tree of free growth, esteemed alike for its beautiful foliage and valuable timber. The nut is sweet and generally large, but the trees being raised from seed, the fruit often varies in size and quality.

Italian or Spanish—A highly ornamental tree of free growth, esteemed alike for its beautiful foliage and valuable timber. The nut is sweet and generally large, but the trees being raised from seed, the fruit often varies in size and quality.

FILBERTS

Barcelona—Nut very large; shell thin. Leading commercial sort.

Duchilla—Nut oblong, thin shell, large and productive; used as a pollener for the Barcelona.

White Avalon—Medium sized nut, thin shell, bears in large clusters. Very prolific.

GRAPES—American Varieties

American Varieties—

Concord—Berries large, globular, almost black, covered with a fine bloom; juicy, sweet and pleasant.

Delaware—One of the best flavored American grapes; bunches medium, compact; berries small, round, beautiful light red; pulp sweet and tender; juice abundant, rich and vinous.

Niagra—Bunch large, uniform, very compact; berry large, mostly round, light greenish white, slightly ambered in the sun; peculiar flavor and aroma; enormously productive. Very fine.

Moore's Early—A most valuable early grape, combining hardiness, size, beauty, quality, productiveness and earliness among its desirable qualities; berry large, round, black.

Campbell's Early—Berries large, often an inch or more in diameter; black, with light purple bloom; skin thin; flesh firm, but tender, parting easily from its few and small seeds.

Worden—Bunches very large and compact; berries large black; an improved Concord.

Moore's Diamond—A vigorous grower, with dark, healthy foliage, entirely free from mildew. A prolific bearer; bunches large, handsome and compact, slightly shouldered; color delicate, greenish-white with rich yellow tinge when fully ripe. Skin smooth and free from specks; pulp tender, juicy, and nearly transparent, with very few seeds. Berry about the size of Concord. Quality best; rich, sprightly and sweet, resembling the foreign Chasselas. Ripens about two weeks before the Concord.

Agawam—It is the best red grape of the American sorts. The vine is vigorous bearing a very heavy foliage. The bunches are large; the berries round, reddish brown in color. Tender, juicy, of excellent quality. One of the best grapes.

CURRENTS

Fays Prolific—One of the best red currants, extensively planted for the market and very profitable. Fruit large; bright red; excellent flavor sub acid.

Black Naples—A beautiful fruit; the finest and largest of all black currants; highly esteemed for jelly.

London Market—Medium size bright red, very prolific; a good market sort.

Cherry—An old sort, very large, good bearer.

White Grape—Bunches moderately long; berries very large whitish yellow; sweet and good. The finest of white sorts.

Perfection—Beautiful; bright red; large size; fine bunches on long stems permitting easy picking without crushing; quality rich, mild, sub acid, with plenty of pulp and few seeds. Very productive, vigorous and hardy.

BLACKBERRIES

Kittiny—Large glossy black; one of the most valuable sorts.

Snyder—A large juicy berry, upright grower, bears well. A good family sort.

Mammoth—A strong grower; trailing habit. Enormously productive; fruit very large size. A cross between the California wild blackberry and Crandels early. Flavor said to surpass all other varieties. Should be in every collection.

Cory Thornless (New)—Was developed in the Mountain pass district in Tuolumne County, California. A mammoth grower and perfectly thornless; is an early berry, ripens here the last of June. This wonderful berry is the largest of blackberries;

very juicy, but is firm and has a delicious flavor of its own. Somewhat resembles the wild blackberry, being almost seedless. It is unsurpassed for canning jam or jelly or eating fresh and brings the highest price on the market.

DEWBERRIES

Lucretia—A trailing variety of the blackberry, producing an abundance of large, glossy black, handsome fruit, of excellent quality; the fruit ripens early and the plant does not sucker. Best of all.

RASPBERRIES—Black Cap

Cumberland—In size the fruit is simply enormous, far surpassing any other sort. The berries run seven-eighths and fifteen-sixteenths of an inch in diameter, and are of such handsome appearance that their fruit has often sold for 10 cents per quart, when other varieties were selling for 5c to 7c per quart. The quality is very similar and fully equal to Gregg. In spite of its unusual large size, the fruit is possessed of great firmness and is thus well adapted for standing long shipment Mid-season. The bush is exceedingly healthy and vigorous, throwing up stout stocky canes, well adapted for supporting their loads of large fruit.

Munger—The fruit of Munger is black, and resembles Gregg very much. It is a better flavored berry than Gregg, tougher in texture and therefore a better shipper. In size it exceeds Gregg by almost 25 per cent, being extra fine for canning and evaporating. In seasons when most others are dry and seedy, Munger ripens up sweet and juicy, and readily brings an advance of 50 cents per bushel over other kinds. The canes, too, resemble Gregg, are free from disease, upright in growth.

Kansas—Strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early, ripening just after Palmer. Berries size of Gregg; of better color; jet black, and almost free from bloom; firm, of best quality; presents a handsome appearance and brings highest price in market.

Gregg—Of good size; fine quality; very productive and hardy. It takes the same position among black caps as Cuthbert among the red sorts. No one can afford to be without it.

RED RASPBERRIES

Cuthbert—(The queen of the market.) Large conical. Deep rich crimson; most excellent quality; a vigorous grower; entirely hardy; immensely productive. The only berry planted in a commercial way for canning.

St. Regis—Everbearing; the new early till late Raspberry, color bright crimson, large size and surpassing quality; rich and sugary with full Raspberry flavor. Canes are of strong, stocky growth with abundant foliage, 3-4 a prolific bearer.

LOGANBERRIES

Loganberry—Fruit long dark red, partakes of the flavor of both the Raspberry and Blackberry. A well known berry. Is planted commercially throughout the Northwest. Ripens in May.

GOOSEBERRIES

Oregon Champion—A variety introduced here from Oregon where it originated. Fruit large, round and immense bearer and entirely free from mildew. Acres of these are being planted commercially. Surpasses all others.

STRAWBERRIES

New Oregon—This handsome, new strawberry, introduced and placed on the market by us three seasons ago, has made a very favorable impression. The berry is very large, firm and handsome; rich, dark red, extending to the center. The flavor is rich, sweet and delicious. For table use and canning it cannot be equaled. The "Oregon" ripens very early and continues in bearing until late in the season a good second crop coming on about October. Very prolific and a heavy cropper.

Marshall—Good quality, firm, color crimson; very large berries.

Gold Dollar—The strawberry most largely grown at Florin and the Sacramento region. Very prolific, good quality and size. Color dark red

Magoon—Has proved to be a leader in hardiness, in addition to all of its other qualities, the Magoon alone has come through the trying weather of hard winters without injury. The Magoon strawberry always brings top prices in the Portland market, and is a remarkable yielder.

Strawberries Everbearing—The two new specials are the Superb and the Progressive. These are everbearing Strawberries and bear all through the Summer up until late fall. They produce fine berries and are wonderful croppers. Every person should have a patch of these, not only for market but for home use.

RHUBARB

Mammoth—Large, early, tender and fine; the very best of all.

Our Guarantee:

While we exercise the greatest care to have all our trees and plants true to name, well grown and packed in the best possible manner, we hold ourselves in readiness on proper proof to replace free of charge or refund the amount paid for all trees or plants that may accidentally prove untrue to label; therefore, it is mutually understood and agreed to between the purchaser and ourselves that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for trees or plants that prove untrue. Our reputation for upright dealing and the uniformly high standard of quality of our products is our guarantee to our customers.

THRTY-TWO YEARS in business here means that our years of experience in growing nursery stock are worth something to the planter. Questions regarding soils, planting and varieties will be cheerfully answered.
